

Dear Community of Kalamazoo,

Did you know that a sexual assault occurs every 2 minutes in the United States?

The prevalence and reality of sexual assault in our community is a staggering issue that we have the power to address. Voices Against Sexual Assault (VOICES) is a local collaboration that includes members from the criminal justice system, non-profit sector, educational community and mental health system who have come together in the belief that we can make a difference in our community.

Through our comprehensive, interdisciplinary approach, VOICES is able to address sexual assault in our community in three important ways:

- Community Education
- Information and Referral
- Sexual Assault Prevention Advocacy

We would like to take a moment to offer our *free* community education services to you. The goal of our community education presentations is to raise awareness about sexual assault in our community including educating the community about perpetrators of sexual assault. We do this by sending individuals or entire panels of professionals to events, classrooms and organizations to discuss the reality of sexual assault including, but not limited to: personal stories of survivors, discussions about working with survivors and perpetrators, explanations of legal processes and the law, sexual assault statistics, myths and facts about survivors and perpetrators of sexual assault, and more!

Each presentation can be carefully tailored to your specific needs and we are willing to work with you to ensure that each presentation is a success! Additionally, VOICES members are available to offer information and resources at community events like health fairs, resource fairs and informational fairs.

Please consider scheduling a presentation through VOICES today by emailing us at info@voicesasa.org. We look forward to hearing from you!

Sincerely,

Sherry Brockway, MSW
Co-Chair, Voices Against Sexual Assault
